Remember: the higher the number ... the thinner the wire.

Did you know...?

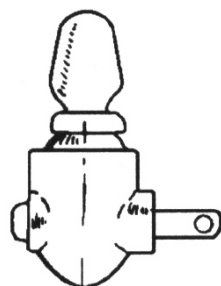

Mosaics pre-date stained glass by centuries! Artisans would craft elaborate designs on walls, floors and pools by using stone, terracotta, obsidian and anything they could lay their hands on! The pieces were broken into shapes, attached by whatever adhesive was available and kept in place using sand and mortar. How do we know this to be true? These designs were durable enough to withstand centuries of weathering. As a matter of fact, so versatile and durable was the mosaic, that the first roads introduced by the Romans were technically mosaics!

---------------------------	---------	--------

Yet another innovative product to marry fun with functionality! Apply a drop of E-6000 (#5219) to glue a fused glass accent into the recess to create a truly one-of-a-kind cabinet door pull! Solid, durable stainless steel construction.

Suncatcher Hanging Line (30 feet)	#130350	\$5.95
Suncatcher Hanging Crimps (24)	#130351	\$5.95

Flexible, but strong, Suncatcher Hanging Line is a great replacement for wire or fishing line. Use the connectors to close the loop instead of trying to tie a knot. The connector is easy to crimp with pliers. Simply run the line through the connector, then through the stained glass hanging loop, back through the connector, and crimp with pliers. It's fast & easy without a knot that may come undone.

Mirror Silver Protector (4 oz.)	#385065	\$12.95
---------------------------------	---------	---------

A must have product to protect that sensitive mirror edge before foiling or leading and soldering. Failure to do so may result in "black rot" - the loss of the mirroring/silver surface around the mirror edges. Apply with small brush, allow to dry 2-4 hours before applying copper foil and solder.
